

Introduction

NSFW Powered by Bitcoin

BOOBS OF BITCOIN is a 10k Collection of Captivating BOOB NFTs and a Privacy and Data Protection Platform for NSFW Content Creators powered by Bitcoin , EVM and NFTs at the Core.

The Motive Behind the Idea (Founder's Thoughts):

The motive behind creating the Project according to the Founder are :

- 1: Data Rights Preservation for Individual Creators in NSFW categories
- 2: The Idea of "Bare Boobs" perfectly represents the Open and Uncensorable Nature of Bitcoin
- 3: Humans (Adult and Children) Needs BOOBS for even getting past their Infancy, Just like Bitcoin is Needed to Survive in the Age of AI dominated Internet
- 4: Humanity Has Always been Obsessed by the "Forbidden"
- 5: They are Cute!

The Problem :

In Legacy Adult Content Platforms, Piracy is a Big Concern for all Creators. It is Often seen that Content of Creators being Pirated , Clipped, Re-Uploaded on different platforms than the Original Platform where the Creator has Posted the Content by someone other than them for the Purpose of Farming Attention and Traffic of Users. This alone creates a Plethora of Problems for both the Creator and the Platform , primary one being the Creator being denied and exploited of what was Rightfully theirs. The Problem is escalated by an Order of Magnitudes with the introduction of AGIs and Generative Art Tools making it even harder to prove the authenticity of Data available , even more so by the Introduction of Deep Fakes using Generative AI.

The Solution:

Blockchain and Web3 Tech as we all know is built on the Idea of Decentralization , and Openness while also providing true Data Ownership through the Use of a Public Ledger. In the Upcoming world dominated by AI , Bitcoin and Blockchain will offer Humans the Option to prove themselves as , "Humans" and preserve the Authenticity and Ownership of Data through the same. In the Field of NSFW Bitcoin can prove to be a Crucial Factor in Preserving the Creators working in this Category from Exploitation. For eg: 1: With the Introduction of BitEVMs , Bitcoin can now support Smart Contracts via L2/Sidechains ... with this , Through use of NFTs , Content Ownership and Proper Compensation Models can be Implemented (royalties and such) 2: Betrayals and Leaks can be stopped , it can be often seen that some Unsavory fans Exploit their Creators by Leaking and Unlawfully distributing Content Gotten for Personal Use. With NFTs that can be totally stopped. Even if they steal the Image asset , the Original Ownership of the Data related to the Image will be with the Rightful owner , and the stolen copy can be traced out effortlessly 3: Data is Available forever On-Chain. Due to the Immutable nature of Blockchain, Data can stay permanent on a Blockchain network thus Minimizing the Prospect of Database wipeouts and Hacks

BOOBS OF BITCOIN PFPs

Exclusive Provocative PFPs of Boobs Of Bitcoin Platform

Boobs Of Bitcoin (BOB) PFPs are a Collection of 10k Unique Generative Pairs Of Boobs. Unlike Only Being a PFP BOOBS of Bitcoin Come with a multitude of Utility as well as a Cool Jpeg to Put as Profile Pic.

Nft Distribution

Total Supply : 10,000 Units

Whitelist : 400 Units

Public Mint: 9600 Units

Minting Details

The Minting Phase for the PFPs is Unlike Traditional , "Boring" PFP Mints. Instead of Plain Old Minting Process We Have Introduced a few Fun Mechanics Around the Initial Mint.

Minting Benefits :

Our Minting Phase offers quite a few Benefits for the Minters along with the Holder Benefits of the NFT Mentioned in the Utility Section. They are:

- 1) Genesis Minter Addresses are Eligible to Earn 6.9% Royalty from Secondary Sales of their Minted NFTs
- 2) Referral System : We have a Referral System for the Minting where you can Invite your friends, family or community to partake and get 15% of the Mint Price , Per Mint by them.
- 3) Bonus Referrals : With Each Mint by Referrals, the Referrer also earns a 1200 Token Bonus allocation added to their fixed Base Allocation in the NFT.
- 4) Raffle Entry : Each Id Upon Mint enters into a Current Round of Raffle. Each Round Consisting of 400 Mints and 4 Random IDs Will be rewarded the Round Pool. 15% of Mints Go to this Pool.

Allowed Mints:

Max Mint Per Wallet: 30 Mints.

Max Mints for Whitelists: 4 Mints.

A Rewarding Referral System

During the Minting Phase after an User "A" Mints Successfully an NFT , "A" Unlocks a Referral Link to Share to their Friend "B" and if "B" Mints from the "A"s Referral Link , "A" earns 15% of the Mint Price as Direct Referral Bonus along with A Bonus Allocation of Tokens from the Airdrop Pool while The "B" Earns A Bonus Allocation of Tokens From Airdrop Pool Too. Here is a Brief :

For Referrer

- 1: Referrer Direct Bonus : 15% of Mint Price from Per Mint From Referrals.
- 2: Referrer Allocation Bonus : 1200 Tokens Per Mint From Referrals.
- 3: Can Claim their successful referrals any time.

For Referred

- 1: Allocation Bonus : 1200 Tokens Per Mint from Someone's Referral Link .

A Fun Raffle Game

The Minting Will be Accompanied by a fun Raffle Game based on Rounds , Starting at Round 2 (Round 1 is for Whitelists. During the process , after each 400 Mints the next round is started and 4 random NFTs minted in the previous round is Rewarded with The Pool accumulated during that round that is Sourced from 15% of Mint Price along with a 1000 Bonus Points Allocation to the winner NFTs.

Here is a Brief:

- 1: 15% of Mint Price Goes to the Current Round Reward Pool.
- 2: Each Round Consists of 400 Mints
- 3: 4 Random NFTs Minted during the Round is Awarded the Current Round Reward Pool equally.
- 4: Winner NFTs are also rewarded with a Bonus 6900 points.

5: Holder of the Winner IDs can claim their reward any time.

BOOB Token

\$BOOB is the Reward and Governance Token of the Platform. With a total supply of 6.9 Billion \$BOOB serves as a way of Participating in the Governance of the Platform and for All Reward based Activities of the Platform. A portion of Revenue Generated is utilized to Buy-Back and Burn \$BOOB from the circulating supply .

Key Utilities:

1: Governance Token : \$BOOB will be the Governance Token of the Platform where Stakers can Vote to make decisions in the Platform.

2: Reward Token: \$BOOB will act as the Reward token for the **Nude-Fi** Dapp we will launch in Q4 of 2024. It will also be the Reward token for Staking BOB PFPs and \$BOOB.

3: Revenue Sharing Token: 30% of All Platform Revenues Generated in BTC will be utilized for Buy-Backs of the \$BOOB Token and Burn It. And 30% of all Platform Revenues Generated will be Distributed Back to in the Form of Dapp and Staking Rewards.

Tokenomics

Tokenomics and Distribution of \$BOOB is yet to be finalized and will be subject to change towards TGE depending on How events unfold.

Tokenomics

Milk Pots

Milk Pots are a Simple Low Entry Cost Raffle where there are Pots (or Rounds) on which each Pot consists of 500 Milk Drops (or Tickets) and Users can Pour one drop at a time into the Current Pot. Each Drop has a Unique Bytes12 Id and an Owner value representing it making each Drop unique Tickets.

About the Game

Each User can pour upto max 10 drops into a Pot , each Milk Drop costing 0.0001 BTC. When the Pot is filled , i.e. reaches 500 Drops 10 Random Drops(Tickets) are selected are selected as Winners and the 85% of the Pot is equally distributed among the Owners of the 10 Winning Drops. After this The next Pot (Round) gets activated and User can Claim his Winning Shares. The Rest 15% Of the Pot goes to Platform Revenue.

Brief:

1: Rounds of the Raffle is called "Pots"

2: Each Pot can hold 500 Drops.

3: Drops are unique Tickets representing entry to the Pot for the User.

4: There can only be max 10 Winning Drops.

5: Each Drop Cost 0.00005 BTC and 85% of it goes to Rewarding Winners

Here is a Rough Overview of the Dapp Contents (Planned As of Now):

a) Creator Browse Section - A Public Feed where Users can Search for their favourite Creators or Browse through Creators and Check their details , this will open the creator profile page

- creator profile page: The creator profile will have the following details

1: Image & Banner

2: Username & ID

3: Bio with Highlight Image (3)

4: Subscription Button and Price (Time-Bound SBTs)

b) User Subscriptions : User can view his subscribed channels and Select to Enter One , this takes then to the Channel Page

c) Channel Page :

For users-: User Can View the Content of their Favorite Creators and Participate in Events and Mints of Exclusive-View-Access Content (for only minted users :P) . There is a selection there for user to view User's Owned Content and Objects.

For Creators -: Creators after Minting their Channel can set join prices , Post NFT Photo, Video and Text Content (with Likes, Comments and Donations) , Hold Exclusive Mints (Photos, Videos) , Hold Votes etc.

d) Profile Page : Users will be able to Mint NFT Profiles in order to have Detailed Descriptions (with updateable data) and will have the quick buy options for Platform token.

e) Staking Section V2: Users will be able to stake their tokens and nfts in order to earn passive rewards generated from protocol revenue. On Staking their NFTs users will be provided the staked form of the NFTs for use as PFPs across platforms.
